Education

Washington University in St. Louis August 2023 - May 2027

Bachelor of Science in Computer Science, Minor in Physics

- **Relevant Coursework:** Artificial Intelligence, Machine Learning, Large Language Models, Data Structures & Algorithms, Cloud Computing, Concurrent Programming, iOS App Development, Systems Software

Experience

Cloud Engineering Intern June 2026 – August 2026

Federal Reserve Bank of St. Louis (FRB)

- Engineered **serverless ETL pipeline** to automate manual log analysis, ingesting **500k+ concurrent Akamai logs** to **Redshift** with **10x peak capacity** for Fed sites including research platforms with **1M+ daily hits.**
- Cut cloud operational costs by **95%** across **15M+ total log files** using **Step Function** optimizations and batching strategies, while boosting parsing speed **10x** by rewriting Python parser in **Go** (**<80ms/file**).
- Architected pipeline observability and regulatory compliance across ingestion stages, implementing automated audit trails, end-to-end encryption, **CloudWatch** monitoring, and **AWS SNS** email alerts for critical issues.
- Built **The Prompt Vault** in **24 hours** for an internal Innovation Challenge, designing a **frictionless 3-click platform** for non-technical employees to deploy pre-crafted AI agents and drive internal Copilot adoption.
- Served as sole Developer and main POC, capturing organic interest and pitching the product directly to **FRB St. Louis Leadership**, **National IT VPs**, & **400+** employees across all **12 reserve banks** for enterprise rollout.

Contract Software Engineer May 2026 – September 2026

Proximity LLC

- **Lead developer** for a WashU off-campus housing marketplace start-up, supporting **300+ active users**, **$500K+** in facilitated lease value across **40+ lease agreements**.
- Made key design decisions on mobile best practices, **App Store compliance**, and cross-platform performance **(React Native)**, guiding non-mobile engineers through architectural decisions and API integrations.

Object-Oriented Software Teaching Assistant January 2025 – May 2026

Washington University in St. Louis

- Mentored **120+ students in C++** object-oriented design, memory management, and debugging, conducting code reviews and evaluating student implementations for architectural clean code practices.

Projects

League of Legends Game Review | *Python, XGBoost, scikit-learn, pytest* October 2026 – November 2026

- Built an end-to-end **ML pipeline** for a **chess.com-style game review**, collecting **∼20K** ranked matches (**∼600K** minute-by-minute states) via a rate-limited, cached API client, validated **100%** against official data.
- Trained a calibrated **XGBoost** win-probability model beating LR and neural-net baselines (**0.8-pt** error on **5.7K** unseen matches), shipped behind a **156-test** CI suite with **data-leakage** and **run-once holdout** gates.

Leetcode 1v1 | *React, Docker, Kubernetes, Judge0, Kafka, Redis, TypeScript, Go* December 2025

- Architected scalable competitive coding platform deploying **7-microservice architecture** on **Kubernetes** with **Kafka** event streaming, featuring intelligent matchmaking system that pairs players by ELO rating in **<3s**.
- Engineered collaborative code editor with **<100ms latency**, enabling live code updates across distributed clients.

People's Voice Survey | *React, TypeScript, D3.js, Mapbox, FastAPI, Express.js, AWS* May 2025 – July 2026

- Built and launched an interactive public health dashboard for **350+ researchers and policymakers**, **presented at the 2025 Science for Health Systems Conference.**
- Engineered scalable backend API with advanced filtering, cutting visualization load times from **minutes to <2s**.

Technical Skills

Languages: Java, Python, Go, TypeScript, JavaScript, C++, SQL, Bash
Cloud & DevOps: AWS, Azure, GCP, Docker, Kubernetes, Kafka, Terraform, CI/CD, Git, Linux
Frameworks & Libraries: React, React Native, Node.js, FastAPI, Flask, PyTorch, OpenCV, MediaPipe, D3.js
Databases & Tools: PostgreSQL, Redis, GraphQL, Firebase, Snowflake, Supabase, pytest, OAuth, Agile
AI & LLMs: Claude Code, Cursor, Prompt Engineering, OpenAI API, Anthropic API, Gemini API, RAG

Awards & Honors

1st Place Google DevFest (AI Clothing Try-On App) | **3rd Place** FRB Innovation Challenge (Prompt Library) | **6x** Dean's List | Collegiate Overwatch Captain (Led 50+ Member Team)
